D8 - Individual Teamwork and Accountability Submission (TEMPLATE)

MIN E 413 Term Project - complete individually; the peer/self-assessment is confidential

> **This is a template, not a submission.** D8 is an *individual* deliverable. Each student writes their own reflection from their own experience and submits the peer/self-assessment confidentially to the instructor (not to the team). Do not copy text between team members. The prompts below are suggestions to help structure the reflection.

Name: _____ Primary role (D1): _____

Part A - Individual reflection (suggested 600-900 words)

Use specific examples (dates, decisions from the decision log, pull requests, meeting minutes). Avoid generalities.

1. **My contribution.** What did I own (work package, files/modules, sections of D2-D7)? What did I review for others? Give evidence (commit IDs, run IDs, decision-log entries).
2. **Coordination.** How did my work depend on others' (e.g. QA/QC decisions → algorithm inputs → block model)? Describe one hand-over that went well and one that did not, and why.
3. **Leadership and followership.** Describe a moment I led (chaired, proposed a method, unblocked someone) and a moment I deliberately followed or supported another member's lead.
4. **Conflict or disagreement.** Describe one technical or process disagreement (for example survey timing, density basis, how to present legacy material, whether to impute grades). How was it resolved under the charter? What would I do differently?
5. **Workload equity.** Was the work shared fairly? If not, what was done about it, and when? Cite the contribution record.
6. **Inclusive practice.** What did I do to make sure everyone was heard (quieter members, different schedules, different levels of coding experience)?
7. **Use of AI tools.** What AI assistance did *I* use, for what, and how did *I* verify it? (This must be consistent with the team disclosure in D6 Appendix A.)
8. **Learning.** One technical lesson and one teamwork lesson I will carry into professional practice.

Part B - Confidential peer and self-assessment

Rate each criterion 1 (rarely) to 5 (consistently). Add a short evidence-based comment for any score ≤ 2 or = 5.

Criterion	Self	[Member A]	[Member B]	[Member C]	[Member D]
Delivered agreed work on time and to standard					
Technical quality and checking of own work					
Communication (responsive, clear, early warning of problems)					
Contribution to decisions and problem solving					
Leadership when needed / followership when appropriate					
Respectful and inclusive behaviour					
Constructive handling of disagreement					
Share of total team effort (%) - must sum to 100
